
NUU - SSU G-LAMP INTERNATIONAL WORKSHOP • OCTOBER 2-4, 2026

Congratulatory Remarks

Recent Research in AI: Mathematics, Statistics and Chemistry

Conference Hall, New Uzbekistan University, Tashkent

Prof. Kyung Nam Jang

Vice President for Academic Affairs, Soongsil University

Greetings

Greetings! I am Kyung Nam Jang, Vice President for Academic Affairs at Soongsil University in South Korea.

Distinguished Guests

I am delighted to join this meaningful international workshop with our distinguished guests:

Dr. Bahodir Ahmedov

Rector, New Uzbekistan University (NUU)

H.E. Do-yeon Won

Ambassador of the Republic of Korea to Uzbekistan

Prof. Jung Jin Lee

Professor, New Uzbekistan University

Prof. Weekyung Kang

Dean & G-LAMP Leader, Soongsil University

...and faculty members and researchers from both universities.

Gratitude & Our Beginning

First, I extend my deep gratitude to Rector Ahmedov and everyone at NUU for their warm welcome and thoughtful preparation.

Last January, Rector Ahmedov—then First Vice-Rector—visited Soongsil University, where our two universities formed a valuable bond and explored cooperation in joint research and student exchange.

A New Starting Point

It is a great honor to represent Soongsil University at NUU today. I hope this visit marks a new starting point for deepening our bond and advancing our partnership.

The Workshop

Over the next three days, researchers from Korea, Uzbekistan, and China will share their latest work in AI, mathematics, statistics, and chemistry, and explore new interdisciplinary research.

As AI breaks down academic boundaries, collaboration across diverse expertise matters more than ever. I hope this workshop helps both universities nurture the talent who will lead the future of science and technology.

Such interdisciplinary research and international cooperation are key drivers of scientific progress. Building on their long friendship, Korea and Uzbekistan continue to broaden exchanges in education, science, and technology.

I hope our partnership will grow beyond faculty collaboration, giving undergraduate and graduate students the freedom to learn and conduct research across borders.

Student & Researcher Exchange

I look forward to welcoming outstanding NUU students to graduate study at Soongsil and to G-LAMP's cutting-edge convergence research—and to Soongsil students and researchers gaining new academic experiences at NUU.

To this end, we will expand student exchanges and joint research, building a lasting foundation where young researchers can grow together.

A Bridge Between Us

This workshop is the first step on that journey. I hope everyone here will take an interest in one another's work and discover new possibilities for collaboration.

May the friendship between our universities become a bridge connecting our laboratories, our classrooms, and the dreams of our students.

With Thanks

I hope the people you meet, the lectures you hear, and the ideas you encounter here become catalysts that shape your research and your lives.

My sincere thanks also go to everyone at NUU and the G-LAMP Group of Soongsil University who made this event possible.

In Closing

In closing, I look forward to lively discussions, new collaborations, and meaningful results. May this workshop become the cornerstone of a bright future that our students and researchers will build together.

Once again, I sincerely wish this workshop every success.

Thank you.
